**Joshua R. Anderson Named Director
of Research & Development at Sabrient Systems**

SANTA BARBARA, CA, September 19, 2006 – Joshua R. Anderson has been named Director of Research & Development at Sabrient Systems. He joined Sabrient in 2004 as Senior Research Scientist, concentrating on financial model development and Sabrient's computational-systems design. Previously, he was with BlackRock Financial Management in New York. His research interests include developing models of investor behavior at individual and institutional levels, and applying these in studies that help form market outcome expectations.

Anderson received a Ph.D. in Economics from the University of California at Santa Barbara, and a B.S. in Electrical Engineering from the University of Colorado at Boulder.

About Sabrient Systems

Sabrient Systems, LLC (<http://www.sabrient.com>) is an independent firm specializing in fundamentals-based, quantitative equity research. Sabrient's proprietary methodology employs multi-factor filters and fuzzy-logic scoring to analyze nearly 6,000 U.S.-traded stocks and identify those that appear poised to outperform or under-perform the market. Founded in 2000, the firm offers customized quantitative research to professional asset managers and has recently launched a research service and web site for individual investors. Sabrient Systems is headquartered in Santa Barbara, CA.
