Sabrient Systems Announces the Launch of Two Indexes

SANTA BARBARA, CA, September 20, 2006 – Sabrient Systems, LLC is pleased to announce the launch of two new stock indexes, one based on neglected stocks and one based on insider behavior. The American Stock Exchange LLC (“AMEX”) serves as the calculation agent for the Index.

Sabrient Stealth Index™ (AMEX: SBRST)

- The Sabrient Stealth Index is a weighted index comprising 150 publicly-traded companies that appear well-positioned to benefit from the academically observed “neglected stock effect,” whereby firms operating “under the radar screen” of Wall Street analysts tend to trade at depressed prices and produce superior returns relative to better-known securities. The Index further identifies those neglected stocks that have displayed robust growth characteristics that give them the potential to outperform, on a risk-adjusted basis, other small-cap benchmark indices.

Sabrient Insider Sentiment Index™ (AMEX: SBRIN)

- The Sabrient Insider Sentiment Index identifies 100 stocks that reflect favorable corporate insider buying trends (determined via the public filings of such corporate insiders) and recent upgrades by Wall Street analysts that follow the stocks, giving them the potential to outperform on a risk-adjusted basis the S&P 500 Index and other broad market benchmark indices.

About Sabrient Systems

Sabrient Systems, LLC (<http://www.sabrient.com>) is an independent equity research firm specializing in fundamentals-based, quantitative equity research. The Sabrient methodology was developed by an experienced research team led by David Brown, a former NASA scientist and retired CEO of Telescan. The methodology employs multi-factor filters and fuzzy-logic scoring to analyze nearly 6,000 U.S.-traded stocks and identify those that appear poised to outperform or under-perform the market. The Company has emerged as one of the primary independent research providers in the SEC-sponsored Global Research Analyst Settlement. Sabrient is headquartered in Santa Barbara, CA.

Sabrient does not guarantee the quality, accuracy or completeness of the indexes noted above or any data included therein.
